

BEHIND THE SCREEN

Hi I am Agustina, I have long blond hair and blue eyes. I am short. I am youtuber and I enjoy very much my job but despite of my good work and effort my followers never increase. So I had an idea. As last year my brother told me about a new challenge that implied going to an abandoned house and staying there for a night. At first I didn't pay attention but then I realized it was a fantastic idea to increase my followers number. So yes! I phoned my youtuber friends, Mathi, Katie, Mariale and Fede.

Finally, we decided to do it.

Later that night I arranged to meet them in the café near Mariale's house. The atmosphere was tense, we were all frightened. When we were going to the house the uber told us the story of the house, he told us that there had lived an old lady with her granddaughter. When the child was 12 she died because the woman poisoned her. Thirty years, later the old lady was killed by the police. And people said that after that night they started to hear noises and some people saw the child and the grandmother walking in the house.

When we entered the house we could see some medicine and wet glasses, as if someone had just drunk water. All my friends including me were recording for our channels. As I was curious I decided to go upstairs where the family rooms were. I could distinguish the room of the youngest. The room was very pretty but full of dust, I couldn't see very well. Suddenly, I heard a noise on the stairs. I was so scared that I ran really fast, as never before. At first I thought it was Fede or Mariale but when I reached the first floor all my friends were screaming because Fede wasn't there. We looked for him everywhere, but we couldn't find him. We decided not to record for a moment in respect of Fede's memory. When we were about to give up, we heard someone crying like a little girl. We were so scared! Some minutes later we decided to investigate.

Katie and Mariale went to the second floor and Mati and me to the first one. Katie started recording for her blog and fortunately the camera captured some evidence. The camera showed an old woman peeping through the door. And we saw a photo frame of a grandma, or that's what we supposed it was, so we picked up the camera and took a photo. When we finished we got together and saved our evidence. We discovered that the woman that was peeping was the same woman in the photo frame.

When dawn arrived we were so worried because Fede was still lost. We started putting everything away. When we were about to leave someone knocked on the door, we thought it was the police so Mariale started to shout and crying, however we opened the door and it was a cute girl asking for candies but it was not Halloween yet!

The kid asked for accommodation. When she entered the house it seemed that she had been there before. She started going up the stairs towards the bedroom of the supposed little kid. We were so confused. She told us that her name was Ana. To our surprise someone opened again the door and... yes it was Fede, we hugged him so strongly and made him lots of questions but he never answered none of them, he seemed to be in shock.

When we were back I published my video and yes! I had lots of views but then I realized that I did not need more followers to be a good person, that followers were only numbers. But I was still scared because we searched in google the photos of the supposed owners of that old house and Ana, the girl that had asked for sweets, was the little girl who had lived there!

END.
